

Zone Safety Training

## **CPR and Automated External Defibrillator (AED) for GP surgeries**

This course provides basic life saving skills to both clinical and non clinical members of your team, including the use of an AED in line with the Resuscitation Council (UK) Guidelines 2015 for GP practices. It conforms to CQC requirements for Healthcare establishments.

This course is delivered on site at your surgery and many practices combine it with Fire Training so all mandatory training is completed in one afternoon.

### **Who is the course for?**

This course is designed for your whole team, including receptionists, admin support, Doctors and Nurses and can be adapted to suit your needs.

### **Number of candidates**

In order to ensure everyone can participate, we recommend 20/25 per course.

### **Duration of Course**

1 hour

### **Cost**

In Gloucestershire £150 - (£175 with drug administration)  
Outside Gloucestershire £200 - (£225 with drug administration)

### **Course content**

- Managing an emergency situation
- Assessment of the Casualty
- Airway Management including bag, valve and mask use
- Cardiopulmonary resus including practice
